Professional Summary

An experienced and highly motivated frontend developer with a strong passion for learning and building websites that provide a great user experience. I am currently a freshman at the University of Houston focusing on my education. I am an active student, always looking for something to do. I volunteer for my school once a week. A future career I'm trying to get into is a software engineer. I seek these jobs mainly to get some money for the school that I want to attend after high school. I can be competitive with anything I do, like tennis or just a normal assignment in school. Over the past year, I've gained more working experiences with tons of different jobs. I want to complete all the educational goals I set for myself while also gaining a wide range of working experience.

Education

Teaching and Learning   In-person
University of Houston

Frontend Development course   Online
FrontendSimplified
